Tizen SDK Install Guide

Overview

There are 2 ways for developing Gear applications : Gear Standalone, Gear Companion.

■ **Gear Standalone:** It consists of only gear application which runs on Tizen-based Samsung Gear devices. In this case, Tizen SDK should be installed.

■ **Gear Companion :** It consists of the Host-side Application which runs on Android-based Samsung mobile devices and the gear application. In this case, Tizen SDK, Tizen Extension SDK for Wearable and Samsung Accessory SDK should be installed.

This document guides how to install Tizen SDK and Tizen Extension SDK.
